**Notes:**

1 Annual Forecasted Building Activity was calculated by taking the average annual building permits issued over the past 20 years to account for the cyclical nature of the economy. On average, 110 single detached dwellings and 72 multiple residential dwelling units are approved for construction each year.

2 The population was forecasted by assuming an average Household Size of 2.9 persons per single detached dwelling and 2 persons per multiple residential dwelling unit.

3 The employment was forecasted using the GGH Growth Plan assumption that Orillia has 0.51 jobs for every resident.
