

## PLEASE SERVE YOURSELF

Companies now are promoting the science  
of increased consumer self-reliance;  
It's a trend that is spreading across the land,  
and it's getting completely out of hand.

I do my own banking and pump my own gas,  
Pick up my own mail and take out my own trash;  
I bag my own groceries when I go shopping,  
This 'serve yourself' movement shows no signs of stopping.

Evidence shows that this trend's on the rise,  
And trying to change it just wouldn't be wise.  
When my time on earth ends I'll know how to behave:  
I'll climb out of my coffin and dig my own grave!
