

The following information must be shown on a site diagram:

- property lines;
- location of all buildings and structures on the property;
- exterior decks and related site amenities, and other buildings or structures on the property;
- location of the parking area on the premises with a minimum number of parking spaces as set out in the Zoning By-law;
- surface type of the parking area;
- location of the outdoor fireplace including noting distance from property lines and structures, if applicable;
- location of the wood burning appliance, if applicable;
- well location, if applicable;
- septic tank and bed location, if applicable;
- measurements can be provided using imperial or metric system.
